- (d) FMFM 7-4 (Fire Artillery Support)

Time Zone: Hotel

Task Organization: Annex A (Task Organization)

1. SITUATION

- a. Enemy Forces. Annex B (Intelligence) and Isams as issued.
- b. Friendly Forces
 - (1) 2d Battalion, 12th Marines (-) (Rein)
 - (a) Battery D
 - (b) Battery L
 - (2) Naval Gunfire Support Ship: See Annex F (Naval Gunfire Support).
 - (3) Aircraft on station: See Annex E (Air Support)

2. MISSION. Supporting arms will be in direct support of 2d Battalion, 9th Marines (-) (Rein) for the duration of this operation, and will be prepared to deliver pre-planned fires and on-call fires as requested by the supported unit.

3. EXECUTION

a. Concept of operations

- (1) The 2d Battalion, 9th Marines (-) (Rein) FSCC will coordinate all supporting arms within the objective area. When supporting arms are firing against confirmed targets, fires will not be interrupted to perform administrative helicopter missions. See Restricted Fire Plan below.

D-1

SECRET

SECRET

- (2) Supporting arms must receive positive clearance from the 2d Battalion, 9th Marines FSCG before engaging any target.

4. TARGET INFORMATIONa. Target List

- (1) Annex B (Intelligence).
- (2) Appropriate target information derived from current ISUM's will be disseminated immediately to appropriate supporting arms agencies.

- b. Restricted Targets. Every effort will be made to preserve religious, cultural, medical and public buildings. Supporting arms fire will not be permitted in populated areas unless the tactical situation makes it mandatory to do so in order to prevent friendly casualties or when failure to do so would jeopardize the mission of the unit.

5. AIRCRAFT SAFETYa. Air Sentries and Lookouts

- (1) Air Sentries will be stationed by artillery firing units, 81mm mortar units, and naval gunfire support ships to insure that friendly aircraft are not endangered.
- (2) Artillery forward observers and naval gunfire spotters will insure that the fires of artillery and the support ship do not endanger friendly aircraft.
- (3) Unless restrictive fire plans are in effect (see below), fire on aircraft routes in use are restricted to observed fires where the observer can insure the safety of the aircraft using the route.

b. Restrictive Fire Plan

- (1) When the possibility of massing supporting arms exists, and when such fires may endanger a simultaneous air mission, a restrictive fire plan will be employed. The following plans will be put in effect as required.

SECRET

- (a) Plan ALPHA. All aircraft supporting the operation must use approach and retirement lanes as indicated in Appendix 1 (Approach and Retirement Lanes) in order to get to the unit requesting their support. Aircraft will report their location in the lane at check points (city names) as indicated and will be directed by the 2d Battalion, 9th Marines Air Liaison Officer during their progress to or from the objective area. No supporting fires will be permitted to pass through any of the approach and retirement lanes indicated in appendix 1 from 0 to 1000 feet during the time this plan is in effect. The Battalion Air Liaison Officer will coordinate aircraft flights and supporting arms within the objective area.
- (b) Plan BRAVO. Under this plan, fire will be allowed to pass through certain specified routes, but no other. Aircraft must stay clear of the specified route, but may use the routes not affected by this plan. Example: "Plan Bravo in effect in FLORIDA."
- (c) Plan CHARLIE. All fires are prohibited between maximum and minimum altitudes within the lane designated during a stated time interval. For the purpose of this plan, the route shown in appendix 1 will be considered to be 1000' wide. The maximum altitude will be 1,500 feet and the minimum, 500 feet. Example: "Plan Charlie in effect in NEVADA from 1035 to 1050."

(2) Medevac. See Annex E (Air Support).

(3) Primary Control frequencies for air support.
See Annex E (Air Support).

6. SAFETY OF GROUND FORCES

- a. No supporting arms will be fired without prior approval of the ground commander in whose zone the fire is requested.

SECRET

- b. No fire lines, fire coordination line, and bomblines.
- (1) See reference (d) for definition.
 - (2) Task Organization Commander will establish no fire lines, fire coordination lines and bomblines as necessary.
 - (3) All such coordination lines will be reported to the 9th Marines for necessary coordination with adjacent units.

7. COMMAND AND COMMUNICATIONS-ELECTRONICS

a. Command Posts

- (1) 9th Marines (AT 996725)
- (2) 2d Bn, 12th Marines (AT 995722)
- (3) Battery D (BT 061579)
- (4) Battery L (BT 062 680)
