1. MISSION. To provide the maximum possible defense measures for units located within 9th Marines Rear Area Defense Zone B.

2. CONCEPT

- a. The number, size, and variety of units presently occupying and scheduled to occupy 9th Marines Rear Area Defense Zone B, requires the establishment of a central coordinating authority for defense of the area. This authority is designated as Coordinator Rear Area Defense Zone B (RADZ-B). This task has been assigned to the Commanding Officer, 1st Battalion, 9th Marines.
- b. Internal security of each separate unit and installation within the complex will be the responsibility of the unit or installation commander. Internal security measures include the establishment of necessary perimeter wire or other obstacles, preparation of defensive bunkers, trenches, observation posts, perimeter lighting, interior patrols, and clearing of fields of fire adjacent to the perimeter. Unit and installation commanders have the further responsibility of planning perimeter defensive fires that cover principal avenues of approach to the perimeter, and coordinating these planned fields of fires to ensure mutual support and safety of adjacent units. Each separate unit should maintain adequate forces within the perimeter as a reaction unit to repel or prevent minor breaches of perimeter security.

C-1-1

CONFIDENTIAL

CONFIDENTIAL

- c. External security of the 9th Marines Rear Area Defense Zone B not assigned specifically to any unit will be the responsibility of the 1st Battalion, 9th Marines, or subsequent infantry battalions assigned as Zone B Coordinator. External security will be accomplished through the planning, coordination, and execution of barrier plan for the complex, and through patrol, ambush, and limited population control measures around the periphery of the complex.
- d. Planning and executing counterattack plans for probable targets within Zone B will be the responsibility of the infantry unit assigned as RADZ-B Coordinator.
- e. The Coordinator RADZ-B will be responsible for centralized coordination, planning, and control of supporting fires and air support within the complex through the Battalion FSCC. Tenant units will provide the Coordinator RADZ-B with defensive fire plans for intergration with the overall defensive fire plan for the complex.
- f. Centralized coordination and control of RADZ-B requires the establishment of a separate channel of communications for coordination of the defense effort during periods of maximum alert and during enemy probes or attacks within RADZ-B. This net will be designated the Defense Alert Net on a separately assigned FM frequency which is compatible to equipment readily available to all tenant units in the complex. The Coordinator RADZ-B will function as a net control. The Battalion TAC Net will be designated as the alternate Defense Alert Net. Primary means of communication among and between the Coordinator RADZ-B and tenant units during normal defensive alert (attack not imminent) will be the established telephone communications system. All units and installation commanders must insure an adequate and protected internal communication system with its internal security elements. Responsibility for maintenance of telephone lines rest with the original installer. During periods of maximum defense alert, units will maintain guard on the Defense Alert Net, and will enter the net during hours of darkness whenever contact is lost on the telephone. If unable to reach net control on the Primary Defense Alert Net, units will enter the alternate net and request instruction.

1. SITUATION

a. General

- (1) The rapid influx of aviation, ground, and service units into Zone B necessitates coordination and over-all supervision of the general defensive plans for this zone. This plan is developed to ensure maximum economy in the utilization of men and materials in preparing the defense of this rapidly growing complex, while at the same time ensuring effective defensive barriers of individual units and the area in general.
- (2) Enemy Forces
 - (a) The enemy has the capability of infiltration into any of the installations within the Zone B complex with saboteurs or small groups of suicide troops for the purpose of destruction of equipment or structures.
 - (b) The enemy has the capability of massing large numbers of troops (up to 300) for deliberate, well planned, and rapidly executed attacks upon one or more of the units or installations within the complex simultaneously.
 - (c) The enemy has the capability of delivering mortar fire into any units or installations within the complex.
- (3) Friendly Forces
 - (a) The infantry battalion assigned responsibility for eastern portion of the 9th Marines TAOR provides available subordinate infantry/ armored units for augmentation of installation defenses and executes counterattacks to repel enemy penetrations of defensive perimeters.

~~Appendix (I)~~

(4)

CONFIDENTIAL

- (b) 2d Bn. 12th Marines provides defensive fires as required to cover avenues of approach and to interdict enemy forces in depth forward of the defensive perimeter.
- (c) 1st MAW provides CAS, AO, and MedEvac aircraft as required.
- (d) 3d Engineer Bn. in G/S Division, provides technical assistance, planning, and installation of specific barriers as required.

2. MISSION. 1st Bn. 9th Marines provide coordination and supervision of planning and coordinates the installation of tactical wire, other obstacles, and defensive minefields in compliance with the provisions of this plan.

3. EXECUTION

a. Concept. This plan is designated as a method of denying promiscuous entry into Zone B, or to delay, deny, and channelize deliberate enemy attacks against units within the Zone. Maximum use of existing outer perimeter wire around installations will be made for purpose of economy and to provide maximum coverage of wire and mine fields by fire and observation. Priority of construction will be based on current probabilities of enemy action. Responsibility for installation of wire obstacles will be played on individual units within the zone for areas assigned to their control. Engineer personnel will provide overall technical supervision and assistance and will provide personnel for construction of specific obstacles such as road and river blocks and beach obstacles. Additionally, construction of wire obstacles in areas not specifically assigned to a unit will be accomplished by a composite detail of all units within the complex under the supervision of supporting engineers. Separate units within the complex will provide fire and observation coverage of wire, minefields, and obstacles within their area of responsibility. The infantry battalion assigned as coordinator of defenses will provide all external security requirements and will provide cover of obstacles and wire in unassigned areas.

b. Infantry Battalion (Coordinator Rear Area Defense Zone B)

- (1) Coordinate the planning for and construction of wire, minefields, and obstacles installed within Zone B.

C-2-2

- (3) Effect liaison with separate units within Zone B complex to coordinate the construction effort and priorities of work.

c. Tenant Units. 9th Marines Rear Area Defense Zone B

d. Coordinating Instructions

- (1) Commanding Officer, 1st Battalion, 9th Marines is assigned as overall Zone Defense Coordinator for Zone B, excluding internal security matters of individual units.
- (2) Requests for engineer or other assistance in connection with the execution of this plan will be forwarded to the Zone Defense Coordinator.

- (2) All installed minefields will be reported by the Supervising Engineer Support Officer on DA Form 1355. Reports will be submitted to III MAF G-4.

b. Logistics

(1) Material Required

Class IV

Wire, barbed, single strand -	30,210 yards
Stake, metal, short strand	7,078
Stake, metal, long	9,795

(Estimates based on standard double apron fence for entire perimeter, including approximately 6,500 yards of beach, and an exterior 4-strand minefield fence. Estimated also includes materials for construction of 5 movable road barriers.)

Class V

Mine, AP, fragmentation type (M16 or M2A4)	-48,397
Mine, AP, blast (M14 or M25)	87,095
Total Requirements	135,492

(Estimates based on Engineer Liaison Officer computations which are available on request. Fields and strips are non-standard, except for approximately 6,500 yards of beach which is a standard field. These estimates are for optimum coverage. A more detailed study of terrain will probably lessen these requirements.)

1. SITUATION

a. Enemy Forces. Current intelligence reports and OOB.

b. Friendly Forces

- (1) USAF, DANANG Airfield provides flare aircraft on call
- (2) 1st MAF provides CAS, AO, MedEvac, and HUL-E gunships on call.
- (3) 2nd Bn, 12th Marines direct support 9th Marines.
- (4) Co "B" (-), 3d Tank Bn, D/S OFCON 1/9 effective.
- (5) Co "L", 3d BN, 3d Marines assigned OFCON 1/9 effective 6 Nov 1965.
- (6) 2d Platoon, Co "C", 3d AT BN, D/S 1/9.
- (7) Provisional Platoon, Co "B", 1st AmTrac BN, D/S OFCON 1/9.

c. Attachments and Detachments. To be specified at time of execution of this plan.

d. Assumptions

- (1) That any enemy attack on units and installations within the Battalion area of responsibility will be accompanied by one or more diversionary or secondary attacks on other units or installations within the area of responsibility.
- (2) That the enemy is aware of the points from which counterattacks would most likely be launched against him.
- (3) That all obvious avenues of approach from the Battalion CP area to the location of the enemy main, and probably the secondary attack location, will be interdicted by mines, ambushes, or mortar concentrations.

C-3-1

CONFIDENTIAL

- (4) That any enemy attack will be coordinated and well planned, to include a withdrawal plan, and will be executed rapidly and intensely.
 - (5) That the probable main enemy attack will be directed against one or more of the following targets, and in the order of priority listed: (This listing based upon current intelligence, and may be periodically revised).
 - (a) Marble Mountain Air Facility.
 - (b) MCB-C, Hospital Site, and/or MCB-8.
 - (c) Bridge, water point, and LVT maintenance area in vicinity of coordinates (BT 072702).
 - (d) Battery "D", 2/12.
 - (e) A forward rifle platoon position.
 - (f) A forward rifle company position.
 - (g) Positions located vicinity of coordinates (BT 083697).
 - (h) Force Recon Company Camp and ARVN training areas
 - (i) 1st Bn, 9th Marines CP (including Supply Section in French Fort at (BT 071709) and Co "B", 3d Tank BN CP.
2. MISSION. 1st Bn, 9th Marines executed counterattacks to restore integrity of, and repel enemy attacks against, one or more of several installations and complexes in the area generally designated as Rear Area Defense Zone B and to counterattack enemy penetrations at forward platoon or company positions or the close support artillery battery.

3. EXECUTION

- a. Concept. In accordance with the concept of employment of the 1st Bn, 9th Marines, one rifle company (reinforced) and elements of tanks, LVT's, and AT's not employed in direct support of forward elements, will be available as a counterattack/reinforcing force available for commitment from vicinity of the Battalion CP.

Commitment of units of less than reinforced platoon size is not anticipated. Tracked vehicles, particularly tanks, will be considered as an integral part of any counterattack force, while LVT's will be considered as the prime troop movement capability where distance from the CP to the objective area is extended.

C-3-2

CONFIDENTIAL

CONFIDENTIAL

Of primary concern the commitment of the designated counterattack force will be the probability of interdiction of attack routes. An immediate assignment will be made at the time of commitment and where feasible, engineer mine clearance teams will be employed in conjunction with the counterattack force. In general however, attack routes specified will be over other than previously used routes. Preservation of indigenous crops or other property will not normally influence the selection of counterattack routes.

Defensive fires for artillery and mortars will be planned and updated daily on a continuing basis for all installations and positions encompassed in this plan. Maximum effort will be made to conduct daily registration. All fire support planning for units located within the area of responsibility assigned to this battalion will be coordinated at the Battalion FSCC. All fire missions conducted through Battalion FSCC.

All aircraft entering the Battalion TAOR during the period of execution of this plan will be under the control of the Battalion Air Officer on the designated radio net. After clearance to the area has been granted, necessary suppression of surface fires have been accomplished, control of the aircraft will be passed to the requesting or using unit as required.

The general concept of Zone defense requires all tenant units within Zone B enter the Defense Alert Net immediately upon attack or serious threat of attack upon any unit in the complex. During normal periods of alert, existing land line communications through unit switchboard will be the primary means of communications.

b. Reserve Company, 1st Bn, 9th Marines

- (1) Be prepared, on order, to execute counterattacks against enemy attacks or penetrations of units or installations within Zone B, or the close support artillery position. (Tab A Counterattack Routes).
- (2) Be prepared, on order, to reinforce any of the other rifle companies to repel enemy attacks against platoon or company bases.
- (3) Upon assumption of the mission as Battalion Reserve, conduct detailed physical reconnaissance of possible counterattack routes, particularly those routes from the Battalion CP to the north.

C-3-3

CONFIDENTIAL

(4)

CONFIDENTIALc. Tenant Units, Rear Area Defense Zone B

- (1) Maintain internal and perimeter security consistent with the current enemy situation.
- (2) Immediately, upon determination that an attack is in progress, or is imminent, enter the Defense Alert Net and inform 1/9 of current status.
- (3) Upon notification that a counterattack is being executed by 1/9, ensure positive control of friendly fire in unit sectors, and enter the radio net of the counterattack force when directed.
- (4) Upon arrival of the counterattack or reinforcing unit in the area of enemy penetration or attack, be prepared to pass operational control of elements in contact to the counterattack force commander.

1. SITUATION

A. ENEMY. VIET CONG FORCES IN THE AREA OF THE OPERATION ARE ESTIMATED TO INCLUDE ONE COMPANY (REINFORCED), CONSISTING OF APPROXIMATELY ONE HUNDRED MEN, EQUIPPED WITH ONE 60MM MORTAR, THREE BAR'S, AND NORMAL ARMS. THE LAST REPORTED LOCATION OF THIS UNIT WAS IN THE VICINITY OF (BT 040710), ON 6 OCTOBER. IN ADDITION, ONE VC PLATOON, IDENTIFIED AS AN "ASSASSINATION PLATOON", WAS REPORTED BY NAD ON 12 OCTOBER

TO BE DISPERSED IN SEVERAL HAMLETS, AT COORDINATES (BT 070710), (BT 027742), AND (BT 087682). (WITH THE EXCEPTION OF THE FIRST LISTED LOCATION, THE LOCATIONS GIVEN FOR THIS PLATOON ARE OUTSIDE OF THE AREA OF THIS OPERATION. HOWEVER, FREQUENT DISPLACEMENT WITHIN A GIVEN AREA IS AN ACCEPTED VC TACTIC, AND THERE IS EVIDENCE THAT THIS SPECIAL MISSION UNIT IS OPERATING IN THE VICINITY OF THE HOA HAI-HOA PHUONG VILLAGE AREA). A RECENT NAD REPORT LOCATES TWO SQUADS, IDENTIFIED AS "SUICIDE SQUADS", IN THE VICINITY OF HOA SON HAMLET, (BT 023736), AND AN AREA IDENTIFIED AS BEING THREE HUNDRED YARDS SOUTHWEST OF THE MARBLE MOUNTAIN BRIDGE. THIS REPORT LOCATES TWO VC COMPANIES IN KHAI TAY VILLAGE, VICINITY (BT 045683), THI AN VILLAGE. COORDINATES (BT 037665), MAU QUANG HAMLET, COORDINATES (BT 033685), AND AN LUU HAMLET, COORDINATES (BT 032672). (THESE AREAS ARE ON THE PERIPHERY OF THE AREA OF OPERATIONS AND COULD INFLUENCE ACTIVITIES WITHIN THE AREA). THE NAD REPORT STATED THAT ONE VC COMPANY IS LOCATED AT HOA DA VILLAGE, COORDINATES (BT 032727), AND HOA PHUONG VILLAGE (BT 056753). THE VC UNITS REFERRED TO IN THIS NAD REPORT ARE EQUIPPED WITH 81MM MORTARS, 60MM MORTARS, ONE HUNDRED TNT CHARGES, AND TWO 57MM RECOILLESS RIFLES. BECAUSE OF ITS PROXIMITY TO THE DANANG AND MARBLE MOUNTAIN AIRFIELDS ITS RELATIVELY ISOLATED

POSITION WITHIN THE CONFLUENCE OF THE SONG VINH DIEN AND SONG CAN DIEN AND THE AVAILABLE COVER AND CONCEALMENT, THE AREA OF OPERATIONS WOULD LEND ITSELF WELL AS AN ASSEMBLY AREA FOR VC ATTACKS AGAINST EITHER AIR FACILITY. ON 30 OCTOBER, TWO DEVELOPED MORTAR POSITIONS WERE DISCOVERED AT (BT 030720) WITH INDICATIONS THAT THESE POSITIONS MAY HAVE BEEN UTILIZED DURING THE 27 OCTOBER ATTACK AGAINST MARBLE MOUNTAIN AIR FACILITY. THE AREA OF OPERATION IS KNOWN TO CONTAIN MANY BOATS AND RIVER CRAFT OF VARIOUS TYPES AND A PORTION OF THE INDIGENOUS POPULATION SPEND A MAJOR PART OF THEIR LIVES ON THE WATER. THE RIVER CRAFT COULD PROVIDE A HAVEN TO VC DURING SEARCH OPERATIONS ON LAND OF PROVISIONS ARE NOT MADE TO CONTAIN AND INVESTIGATE ALL BOATES IN THE AREA. IN THIS REGARD, IT SHOULD BE REMEMBERED THAT, ON 27 OCTOBER, PRIOR TO THE ATTACK ON MARBLE MOUNTAIN AIR FACILITY, THE 1ST BATTALION CONDUCTED A SEARCH OPERATION IN THE VICINITY OF THE AIRBASE, AND REPORTED THAT 15-20 HOUSEBOATS, POSITIONED AT (BT 050743) REFUSED TO HEED WARNINGS FROM HELICOPTERS TO BEACH ON SHORE FOR INVESTIGATION, AND ELUDED SEARCH. IN LIGHT OF SUBSEQUENT HAPPENINGS, FAILURE TO INCLUDE THE RIVER CRAFT IN THE OPERATION MAY HAVE ASSISTED THE VC. THE INDIGENOUS POPULATION OF THE AREA OF THE OPERATION IS APPROXIMATELY 3000 PEOPLE.

Another patrol from the 1st Battalion moving southeast from (BT 054716) caused the VC to attempt to escape to the east toward the river. Three VC were observed dropping something on the west bank of the river at (BT 060717). The VC then entered the water and started to swim to the east. Tanks fired three hundred rounds of 30 caliber ammunition and probably killed two of the three VC. The third VC was believed to have escaped. A VC was observed moving down the western bank of the river to (BT 062715) where he entered the water and swam east. The squad at (BT 066714) opened fire with thirty rounds of small arms fire and 40 rounds of M-60. The VC dove and was not seen again. 2. OperationsA. 1st Battalion

(1) Co A. At 271140H elements of Co A found and destroyed one CHICOM grenade at (BT 094666). At 271245H local security for a supply helicopter landing zone at (BT 095660) received three rds of carbine S/A fire from (BT 094659). One man was WIA in the lip but did not require evacuation. VC broke contact after firing. At 271415H Lepers brought in a 12 year old VN boy who had been wounded by a mine at (BT 092652). Med-evac.

(2) Co D. Between 270800H and 271300H one squad of the 2d Flt, Co D, reinforced by four AMTRAC's and two 14-foot aluminum boats powered by 9½ horsepower motors conducted a river patrol on the SONG CAN BIEN between the bridge and water point at (BT 071701) and grid line (BT 67). The four AMTRAC's moved down the middle of the river as the boats moved on the flanks. Five Marines occupied each boat. These five men consisted of a fire team and a coxswain. Twenty boats were searched, and a foot bridge, believed to be used by VC to cross the river, was destroyed at (BT 082676). As a result of this patrol it was found that due to high water the waterways in the Bn TAOR were very negotiable by AMTRAC's and made it highly feasible to reinforce and resupply front line companies along waterways by AMTRAC's. Boats proved to be very effective in conducting river patrols. The patrol returned to the Bn CP at about 271330H without making contact with the VC.

A. Special Report on 3/9 Operations 27-28 Nov 65.

Co K (-) proceeded south from the Co base camp toward BICH BAC (AT 986633) in three plt size columns each converging on the hamlet from a different direction on the morning of the 27th. The real mission of the Co was to covertly drop a plt south of BICH BAC to act as a blocking force for the three company S&C opn to follow the next morning. The company conducted extensive civil affairs and psy-war work as a cover for their real mission. The plt that was to stay in the hamlet thoroughly reconed their patrol base during the day and at 271230H the Co began moving in and around the cane field where the platoon was to hide. Upon a prearranged signal the Co began a seemingly unorganized withdrawal toward the Co patrol base. The platoon remained behind hidden and camouflaged in the cane field. Approximately one hour after the co (-) departed, the villagers sounded the all clear by the use of bamboo drums. The patrol remained hidden and the following morning ten VCS were apprehended as the Bn (-) began their southward movement. Three of the ten were confirmed as VC during Bn interrogation.

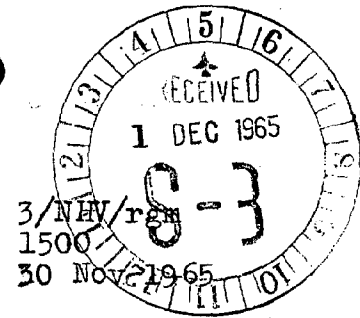

B. 594th Bn. RF. A plt of the 594th Co was in position at QUA GIANG (2) (BT 003670). The Pacification Team in the hamlet went back to 594th Co CP at GIANG DONG (BT 006677) because they were afraid of reports of VC. At 1900 plt in QUA GIANG (2) (BT 003670) received report from villagers that two VC plts were moving north from NHON THO (1) (BT 002665). At 281915H 594th Plt made contact at (BT 003670). At 281935H the Plt Cdr began a move to (BT 011673). The plt was ambushed at (BT 007671) by an estimated 15 VC with one BAR. The VC wore farmers raincoats for camouflage. The plt moved back to the 594th Co CP (BT 007677). Upon arrival they were missing six RF soldiers. 3/9 provided illumination. RF saw three bodies. Sent detail to pick up three KIA. 29 Nov they searched area, found two RF's hiding in paddies who had become lost in ambush. One RF still MIA. One RF WIA. Weapons lost: three M-1's and one sub machinegun.

5. Psy-War. 1st Battalion. Psy-War planned for today was cancelled because Psy-War team did not arrive as scheduled. From 300730H to 300900H an aerial broadcast and leaflet drop will be made over major population centers throughout the Bn TAOR.
